About OVC:

The Ohio Valley Center for Brain Injury Prevention and Rehabilitation conducts research and develops new programs to serve persons who have experienced traumatic brain injury. The Center focuses on outcomes research, substance use disorders, resource and service coordination, and employment.

The Ohio Valley Center is located in the Department of Physical Medicine and Rehabilitation at Ohio State University. John D. Corrigan, PhD, is the Director; and Gary L. Lamb-Hart, MDiv, is the Center Manager.

The **Substance Abuse Information Series** of the Ohio Valley Center includes:

"User's Manual for Faster, More Reliable Operation of a Brain After Injury"

A booklet for individuals and family members that discusses risks of alcohol and other drug use after brain injury.

“Manual del Usuario Para Más rápido...más confiable funcionamiento del cerebro después de una lesión”

Spanish version of the User’s Manual.

"Substance Use and Abuse After Brain Injury: Programmer's Guide"

A manual for rehabilitation facilities to develop a systematic program of education and prevention about the use of alcohol and other drugs after brain injury.

"Substance Use and Abuse After Brain Injury: Utilities for Community Professionals"

A packet of resource materials for community-based professionals that introduces intervention approaches and provides screening tools for both substance abuse and brain injury.

“Substance Abuse and Brain Injury Toolbox”

Contains: 5 copies each of the “Users Manual” and “Manual del Usario” (see description above), 1 copy of the “Programmer’s Guide” (see description above); 1 copy each of English and Spanish versions of a video “For Faster, More Reliable Operation of a Brain After Injury” in VCR format; and 1 copy of a DVD combining both video versions.

www.OhioValley.org

The Ohio Valley Center website, which includes information on substance abuse.

www.SynapShots.org

A website addressing topical issues in TBI, including substance abuse.
